

Rescue Challenge was born in 1995 through the Technical Rescue Association of Virginia. Currently, 10 rescue teams participate in 8 different scenarios throughout a 4 day period with limited guidelines and little to no interference. With safety being paramount, each site is given a dedicated facilitator and a safety officer to assist with oversight. The scenarios are set up at different locations around a host jurisdiction and provide some of the best training evolutions available anywhere. VDFP has, since its' inception, been a proud sponsor of Rescue Challenge.
